Preface

Voorwoord - Vorwort - Préface

GB

At Raboesch Models we have been, enthusiastically, creating model ship building products for more than 36 years. High-quality products, precise tools and professionalism result in top quality-products. Through a global network of distributors and dealers our products end up in the hands of the hobbyist. Also outside of the model building sector companies discover the high and constant quality of the Raboesch products. Our products are being used, more and more lately, in the high-tech industry, such as in robotics, various research & development departments and government institutions.

In front of you lies the Raboesch catalog with all the new as well as the more trusted classic products. We wish you plenty of enjoyment while perusing our offers and we invite you to allow yourself to be inspired at one of our retail outlets. On our website: **www.raboeschmodels.com** you will find an up-to-date overview of all our products and activities.

108-30

108-30

Bow thruster with 2 propellers.
A G-ring ensures water tightness.
The gears are water-lubricated.
Diameter of the jet nozzle: Ø 30 x 33mm.
Power 400 motor: 7.2 Volt - 11 Amp max.
Length of the motor housing: 48 mm.
Total length: 138 mm.
Total height: 85 mm.
Weight 150 gr.

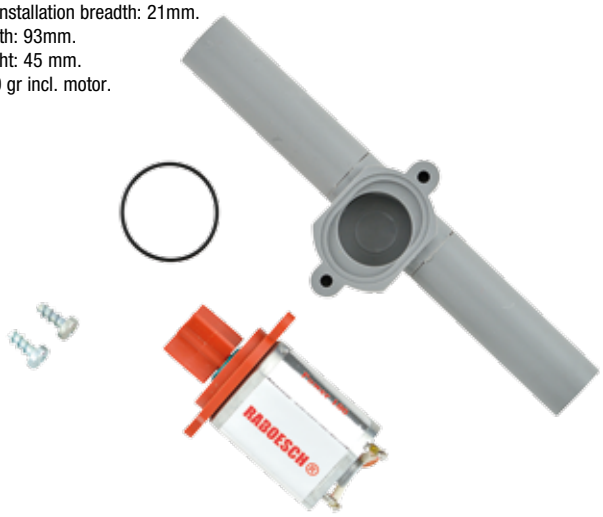

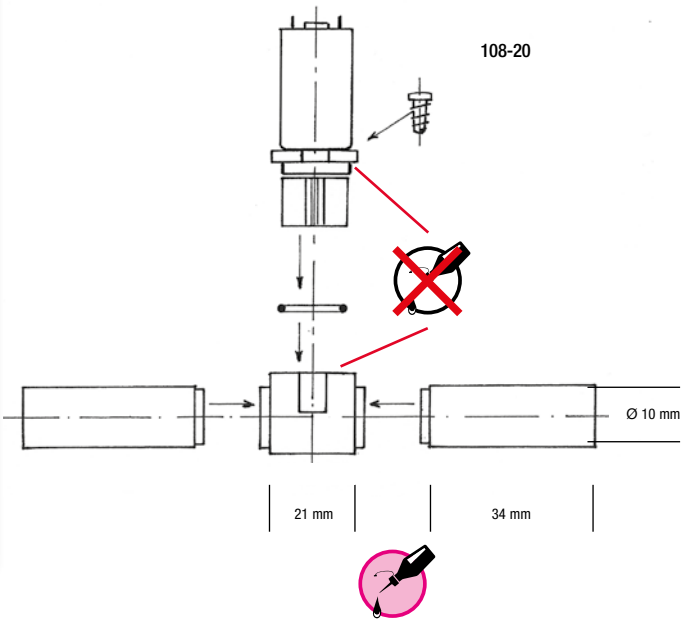

108-20

108-20

The world's smallest bow thruster.
Power 100 motor: 3-12 volt, 6 Amp max.
Material: ABS.
A G-ring ensures water tightness.
Jet Nozzle diameter Ø 10 x 12mm.
Smallest installation breadth: 21mm.
Total length: 93mm.
Total height: 45 mm.
Weight 30 gr incl. motor.

These very powerful bow thrusters are supplied fully mounted with a Power 400 7.2-Volt electrical motor, 11 Amp. max. The propulsion is provided by a flat propeller (paddle) which pressurizes the water through jet nozzles whereby the entire assembly functions as a pump. This design is very robust and very stable and requires very little maintenance. The pump housing and the extension tubes are made of ABS (acrylonitrile butadiene styrene). The motor is sealed with a G-ring and an O-ring which prevents the entry of water whereby the bow thruster can be installed vertically as well as horizontally. The motor with the pump housing cover can be removed easily. The cover has an O-ring that ensures water-tight sealing of the entire assembly. For further technical information: See the dimensional drawing and the technical details of the motor. Spare parts: 108-06: The pump housing cover, including pedals. Loose jet nozzles (P):108-07(108-01) – 108-08(108-02) – 108-09(108-03) – 108-10(108-04) – 108-11(108-05) 108-12: Power 400 electrical motor. RPM 17.000 – voltage without load: w0.5 Amps – Blocking voltage: 20 Amps. Highest performance: 78% - Motor shaft: 2.3 x 12 mm. 108-35: Flat Propeller (2x) for 108-01/03. 108-36: Flat Propeller (2x) for 108-04/05.

These RABOESCH high quality propeller shafts have a large range of application. For simple electric boats which are made from ABS, wood, please use 300-00/04. 300-01-03 have strong ABS tubes which makes gluing to your scale model very simple. The other propeller shafts have brass tubes. 300-11 has an extra strong shaft and tube. All the RABOESCH propeller shafts can be shortened very easily. All shafts are made of STAINLESS STEEL.

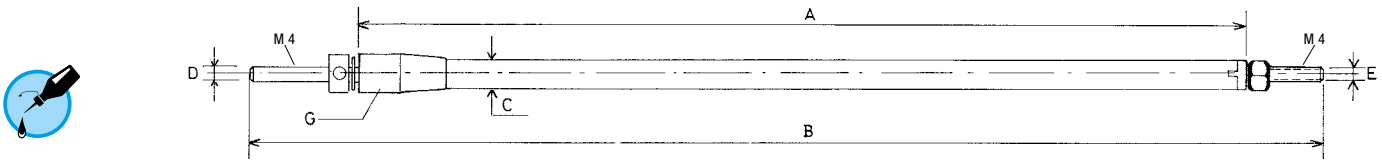

You can shorten these shafts yourself by using a saw.
